

Your practice. Your patients. Your choice.

BDA Conference and Exhibition

Leading provider of practice branded dental plans, DPAS, will be looking to promote some of their new administration solutions at this year's BDA conference and exhibition. DPAS's newly launched implant insurance, as well as their interactive children's website, designed to give children a better understanding of dentistry and oral health care, will both feature on the DPAS Stand, A60.

The theme for this year's conference and exhibition, running from 4th - 6th of June 2009, is 'Securing your future: realising your potential' and features a variety of motivational and advisory seminars designed to help dentists overcome the current financial conditions that so many practices throughout the UK are facing.

At a time when patients are considering their financial commitments, it is more vital than ever for practices to promote the importance of maintaining routine dental care. DPAS are perfectly positioned to help practices through the current economic challenges, with their range of dental plans designed to ensure that routine dentistry remains an affordable option for patients.

DPAS offer unique, tailor made payment plans, membership plans and children's plans, each designed to enhance the attraction and retention of private patients.

For more information on DPAS's range of practice branded plans visit Stand A60 or call 01747 870910. www.dpas.co.uk.
