

Your practice. Your patients. Your choice.

Protect Your Patients' Dental Implants

With success rates of over 95%, dental implants are undoubtedly an attractive treatment option, but in the small number of cases where damage occurs, implant insurance can be of great value.

Leading providers of cost effective 'practice branded' dental payment plans, DPAS, are now offering existing customers a Dental Implant Accident Protection Policy, underwritten by ACE European Group and designed to help protect your patients against unexpected accidents that cause damage to one or more of their implants.

By committing to a premium of only £25.20 per year, regardless of the number of dental implants placed, patients who need to claim can receive up to £2,500 per implant towards the cost of repair or replacement. Together with additional benefits that compensate for the inconvenience of a hospital stay or travel costs when patients return to their chosen implant dentist following an accident, DPAS's implant insurance offers patients' peace of mind when committing to this high value treatment. As the demand for implant dentistry increases, this cost effective policy has never been more appropriate. For more information call DPAS on 01747 870910 or visit www.dpas.co.uk.
