Your Children's Plan

Dental payment plans for children are just as important, if not more so, as they are for adults. Receiving preventative treatment can provide the foundations of a high level of oral health for life. Children's health care can never be overstated, thus the need for private practices to have Children's Plans.

DPAS' Children's Plan offers tailor made plans to children between the ages of four and eleven and offer a preventative, education driven approach to paediatric dentistry. All patients can become members of the gr8 smile club where children will soon be able to access www.gr8smileclub.co.uk; this interactive educational website will entertain as well as teach children the importance of oral health care.

This plan gives you the chance to safeguard your income but more importantly guarantee the regular attendance of children, offering parent's peace of mind that their children's mouths are healthy.

For more information on the Children's Plan, or any other Plan offered by DPAS please contact 01747 870910 or visit www.dpas.co.uk
