

Your practice. Your patients. Your choice.

Your Plan...Not Ours!

If you are one of the people counting down the days to the 31st March and preparing to convert to private provision, or maybe you already have, then it's important to understand that payment plans can do more than just safeguard your income; they can also help promote your practice.

'Practice-branded' payment plans are the way forward for any forward-thinking practice. At DPAS we understand that every practice is unique and that all patients have different needs. So we can help you develop a 'practice-branded' plan that is yours and yours only, tailor-made to suit your needs together with your own practice identity - after all it's your plan, not ours!

So whether you've recently converted from NHS to private practice or have an established private practice, we can help make the transition to a 'practice-branded' plan as smooth as possible. With the additional support of a complete re-brand if required, DPAS will help you organise open days, send letters to your patients and communicate the benefits of your practice and your plan to your patients.

Being a leading provider of straightforward, cost effective 'practice branded' dental plans that deliver high quality at the lowest charges there is really no contest when there comes a choice between DPAS and any other payment plan provider.

Take your practice one step further with a DPAS 'practice-branded' plan and call 01747 870910 or visit www.dpas.co.uk today.
